1 Wheel		£15.00	£30.00	
2 Wheels		£20.00	£40.00	
Disclaimer				
At Central Wheel we endeavour to supply goods as ordered, all our parts are made as replacement parts and as such may not be exact replicas for originals.				
To hold tooling in stock to cover all the spokes ever produced for every model is both impractical and impossible. However all spokes supplied will be produced in the knowledge that they will be suitable for use in rebuilding of the respective wheel. Where possible all rims will also be supplied to original dimple and spoke hole configuration, this is not always possible on pre dimpled stock, on these occasions the drilling pattern will be changed to accommodate fitment to the customers hub. It is in the interests of both CWC and you the customer to be clear in your requirements when placing your order to eliminate the possibility of incorrect supply. For less common models of bike spoke samples or spoke lengths should be supplied where possible, and hub dimensions supplied for the purpose of correct drilling of the rims.				
Returns Policy				
Incorrectly supplied or faulty goods should be notified within 10 days of receipt, if goods have to be returned please ensure the invoice or delivery note stated on the returns note, the goods will then be inspected and repaired or replaced as required. The postage costs for faulty goods will then be re-imbursed. Goods returned due to customer error when placing the order will carry a 25% restocking charge, and return postage will not be re-imbursed. Any replacement parts will only be despatched once faulty items are returned. If replacement parts are required urgently then they will be sent and invoiced, and a credit note will be raised once the faulty items have been returned.
